REMA TIP TOP – the Brand for Conveyor Belts and Service

REMA TIP TOP offers a complete conveyor belt program for mining and industrial markets from our nationwide shops. Our shops are strategically located throughout the U.S., with field splicing and service capabilities. Our sales support and field service technician teams can recommend and / or design a custom solution that is best for you. REMA TIP TOP provides a one-stop shop for all your conveyor belt and service needs.

REMA TIP TOP's two belt brands, **PHOENIX Conveyor Belts** and **T-REX Belts**, are stocked from our nationwide shops. **PHOENIX**, is a high-quality, premium brand of belting, that is well-respected throughout the globe. **PHOENIX** specializes in all types of belting, ranging from heavy-duty fabric belts to steel-cable belts for the most demanding applications. **T-REX Belts** are high-quality belts at a competitive price and truly stand out from the typical black belt.

REMA TIP TOP Services

Service for the customer is always in focus at **REMA TIP TOP**. Our in-depth knowledge and training program of **REMA TIP TOP**'s technicians is unprecedented in the industry.

REMA TIP TOP's expertise in combination with dedication and a can-do attitude sets us far apart from the competition.

COVER RUBBER TESTING	RMA	DIN
Abrasion		✓

Tear Resistance		✓
Elongation at Break	✓	✓
Separation Strength	✓	✓
Geometrical Differences		✓

DIN vs. RMA

DIN is a comprehensive and widely used standard that analyzes more attributes than the RMA. Two notable attributes DIN includes but RMA does not, are the abrasion and tear resistance of belting cover rubber. DIN standards can reduce quality uncertainty and minimize the risk of premature belt failure.

REMA TIP TOP supplies belts that meet DIN standards.

REMA TIP TOP proudly supplies

PHOENIX is the German-based world leader in conveyor belt technology, with over 100 years experience and numerous world records. The Phoenix line of conveyor belts have been tested and proven to provide the highest level of product performance in conveying applications worldwide.

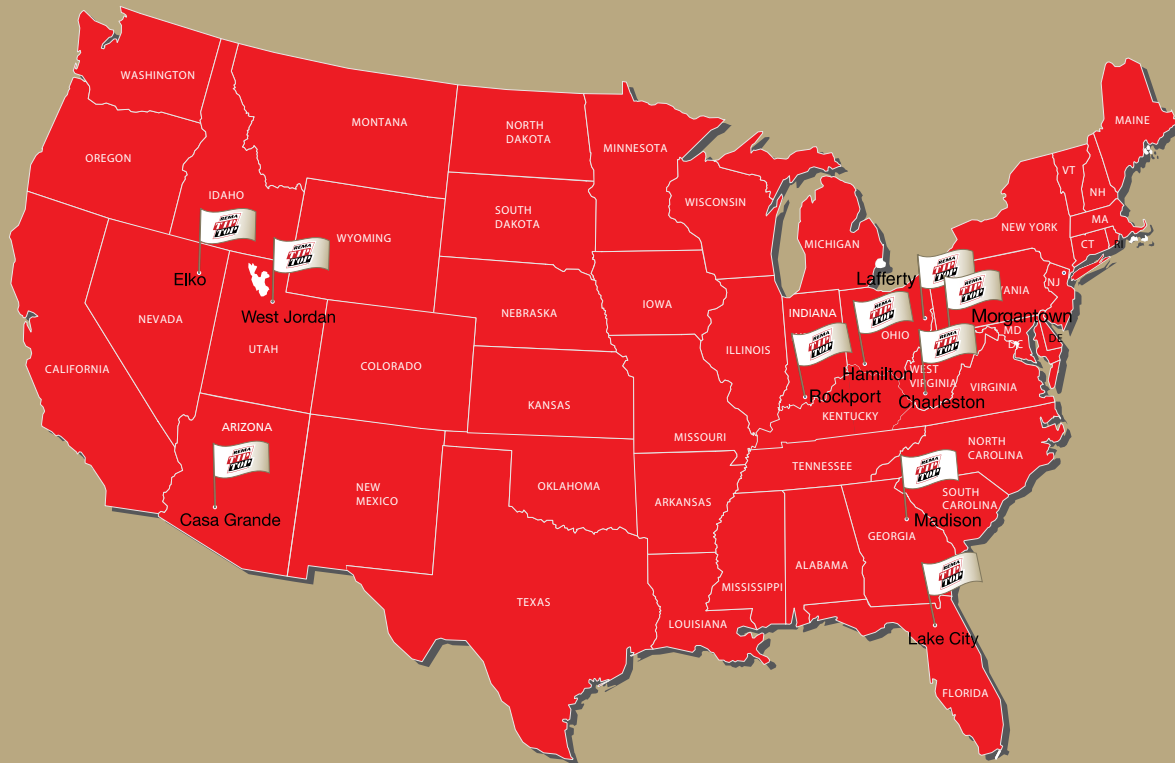

PHOENIX and **REMA TIP TOP** have a close partnership and work together to serve the North American market wherever a premium brand of belting is required.

T-REX is our established brand serving a wide range of bulk materials industries. **T-REX** belts are stocked locally at **REMA TIP TOP** shops which makes them quickly accessible.

Belt specifications of **T-REX** comply with both the DIN and RMA standards. DIN Y and RMA I are commonly available from our inventory.

T-REX is the economical belt choice without compromising belt quality. Our engineers can help you choose the optimal belt that is just right for your system.
